Transaction Failed

Transaction Results

Failed. (Code: 922)

The most common error codes are **Code 922** and **Code 919**. Code 922 indicates that the 3-D Secure authentication failed during the online transaction process, while Code 919 suggests there may have been a connection issue during the credit card transaction. If the transaction fails due to either of these errors, please contact your bank for assistance, then try again or use a different card. **However, if you encounter a different error code, please send us a screenshot that includes the error number.**

常見的錯誤代碼包括922與919。代碼922指的是線上交易過程中3D驗證失敗；代碼919則代表信用卡交易過程中發生連線問題。

如果你交易因這兩個錯誤代碼而失敗，請聯絡你的銀行協助處理，可以再嘗試操作一次或者是用其他張信用卡。

如果你遇到其他的錯誤代碼，請將包含錯誤代碼的螢幕截圖寄給我們。
